

Project Documentation

FitBuddy AI — Project Deliverable

Package the FitBuddy AI project documentation, executable/setup information, configuration guidance, and safety notes into one phase deliverable.

Deliverables in this single phase document

- Project Executable / Setup Files
- Sample Project Documentation
- Security & Responsible Use

Evidence status — Documentation content is directly supported by the supplied README and FitBuddy project documentation.

7.1 Project Executable / Setup Files

The documented project structure includes the app package, templates, static assets, tests, .env.example, .gitignore, README.md, and requirements.txt. The Windows setup sequence uses a Python virtual environment and Unicorn.

File / Area	Purpose
app/	Application source package
templates/	Jinja2 browser templates
static/	Responsive CSS
tests/	Automated test suite
.env.example	Shareable environment template
.gitignore	Version-control exclusions
requirements.txt	Python dependencies
README.md	Setup, run, API, testing, troubleshooting

7.2 Sample Project Documentation

- Project overview and features.
- Technology stack and project structure.
- Windows + VS Code installation steps.
- Environment configuration and secret-handling guidance.
- User workflow and screenshots.
- Routes/API reference.
- Admin/all-users view guidance.
- Testing and troubleshooting.
- Security, privacy, and responsible-use notes.

7.3 Security & Responsible Use

- Do not commit the real .env file.
- Use .env.example as the shareable template.
- Rotate any API key that has been exposed.
- Use a strong private admin key outside a local demo.
- Do not expose the all-users endpoint/view to untrusted users without appropriate access control.
- Treat generated activity suggestions as general wellness information, not medical advice.

7.4 Documentation Quality Checklist

- README present
- Requirements documented
- Setup steps documented

- API routes documented
- Testing command documented
- Troubleshooting included
- Security guidance included
- Demo workflow included

Project Evidence / Screenshots

A screenshot of a code editor showing a .env file. The file contains several environment variables, some of which are redacted with black boxes. The variables are: APP_NAME=FitBuddy AI, DATABASE_URI=sql [REDACTED], GEMINI_API_KEY=AQ.Ab8RHG1kQ_xWkY-15nBc5uRzHl036zb5ZvdO-xK_BTApqyl01A, GEMINI_WORKOUT_MODEL=gemini-2.5-flash, GEMINI [REDACTED], DEMO_MODE=true, and ADMIN_KEY=fitbuddy-demo-admin. The code is written in a dark-themed editor with line numbers on the left.

```
.env
1 APP_NAME=FitBuddy AI
2 DATABASE_URI=sql [REDACTED]
3 GEMINI_API_KEY=AQ.Ab8RHG1kQ_xWkY-15nBc5uRzHl036zb5ZvdO-xK_BTApqyl01A
4 GEMINI_WORKOUT_MODEL=gemini-2.5-flash
5 GEMINI [REDACTED]
6 DEMO_MODE=true
7 ADMIN_KEY=fitbuddy-demo-admin
8
```

Screenshot evidence: environment configuration shown with sensitive values redacted.

Source note: This phase document was converted from the supplied FitBuddy AI project documentation, README, configuration/dependency information, and supplied project screenshots. Where the source did not provide a measured result, named team member, or actual date, the document does not present one as a completed fact.
