

Project Demonstration

FitBuddy AI — Project Deliverable

Prepare the final FitBuddy AI demonstration from the documented end-to-end workflow, including communication, proposed features, scalability, and future work.

Deliverables in this single phase document

- Project Demo Plan
- Communication & Team Involvement
- Proposed Features
- Scalability & Future Plan

Evidence status — Demo workflow is documented; team names, measured scalability results, and production deployment results were not supplied.

8.1 Project Demo Plan

- Start the Uvicorn server.
- Open the FitBuddy AI home page.
- Enter a sample profile.
- Generate the 7-day plan.
- Review the nutrition/recovery tip.
- Submit feedback, such as a practical warm-up adjustment.
- Show the revised plan.
- Optionally show /docs and the documented API workflow.
- Conclude with testing, safety, and future-development notes.

8.2 Communication & Team Involvement

The supplied documentation explains the workflow but does not identify individual team members or their assigned presentation roles. Use the structure below for the final presentation.

Role	Person / responsibility to fill
Project introduction	_____
Problem & requirements	_____
Solution / architecture	_____
Live demo	_____
Testing & security	_____
Future scope	_____

8.3 Proposed Features / Future Scope

- Continue improving feedback-driven plan revision.
- Expand personalization while keeping general-wellness safety boundaries.
- Strengthen automated and performance testing.
- Improve administrative access control before non-demo deployment.
- Add further monitoring and deployment practices as the project moves beyond local demonstration.

8.4 Scalability & Future Plan

The current documentation positions FitBuddy AI as a local software demonstration. A future production-oriented version should be evaluated for stronger authentication/authorization, deployment architecture, database scaling, monitoring, secret management, and load testing before being exposed to untrusted users.

8.5 Final Demonstration Checklist

- Server running
- Home page shown
- Profile entered

- 7-day plan generated
- Nutrition/recovery tip shown
- Feedback submitted
- Updated plan shown
- API docs available
- Testing evidence available
- Future scope explained

Project Evidence / Screenshots

The screenshot shows the FitBuddy AI home page. At the top, there's a header with 'FitBuddy AI' on the left and 'API Docs' on the right. Below the header, the main heading reads 'PERSONALIZED WELLNESS' followed by 'Build a plan that fits your routine.' A subtext says 'Enter a few details and FitBuddy creates a structured 7-day activity plan plus a practical nutrition or recovery tip.' Below this is a form titled 'Tell us about you' with fields for User ID (u1001), Name (Vigneshwaran), Age (20), Weight (kg) (55), Goal (Flexibility), and Preferred intensity (Medium). A large green button labeled 'Generate My Plan' is at the bottom of the form. A small disclaimer at the very bottom states: 'Demo mode works without an API key. This app is for general wellness education, not medical advice.'

Demo opening: FitBuddy AI home page.

The screenshot shows the FitBuddy AI interface after a plan has been generated. At the top, there's a header with 'FitBuddy AI' on the left and 'New Plan API Docs' on the right. Below the header, a green notification bar says 'Plan generated successfully.' Below this is a section titled 'YOUR PROFILE' with the text 'Hello, Vigneshwaran.' and a table of profile details: ID (1001), AGE (20), GOAL (flexibility), and INTENSITY (high). Below the profile is a section titled '7-Day Plan' with the text 'Personalized 7-Day Wellness Plan for Vigneshwaran' and 'Goal: Flexibility | Intensity: High'. It includes instructions: 'Use comfortable effort, stop if something hurts, and adjust activity to your ability.' and lists activities for Day 1, Day 2, and Day 3. To the right of the 7-Day Plan is a section titled 'Nutrition & Recovery Tip' with the text 'Pair gentle mobility with regular meals, hydration, and enough rest. Never force a stretch into pain.' and a 'Want to adjust it?' section with a text input field containing 'change the warm up time to 10 minutes' and a green 'Update Plan' button.

Demo middle: generated plan.

Demo close: updated plan after feedback.

Optional technical evidence: local server running.

Source note: This phase document was converted from the supplied FitBuddy AI project documentation, README, configuration/dependency information, and supplied project screenshots. Where the source did not provide a measured result, named team member, or actual date, the document does not present one as a completed fact.
